Space	Med-MetRx's substantially reduces the time and energy required to analyze prescribing patterns. There will no longer be a need to shuffle stacks of paper; users can simply point and click to view network prescriber patterns. Is provider analysis based on your specific standards and criteria a requirement for your organization?	Space
Space	Med-MetRx delivers! This translates into enhanced provider buy-in based on the feedback delivered in profile reports. Gone are the days when someone else's standard must be applied to your network. You can create your own best practice standard for profiling your provider network.
